

# Assignment 1- Contributions

We [Smitesh Patil, Ambuj Mittal, Dhruv Solanki] worked together on this study 'Critical Review on Deep Learning for Medical Image Segmentation based on X-Ray Images',

Three of us went through each of the 8 research papers mentioned in the literature and each of us came up with the initial write-up for the paper. Then, we collated the writeup to prepare the final draft. Ambuj formatted the write-up and generated the IEEE format using latex. Smitesh did the comparison part with the table in the research paper generated using R.
